Pragmatics and Grammar. When using language, many aspects of our messages are left implicit in what we say. While grammar is responsible for what we express explicitly, pragmatics explain how we infer additional meanings. The problem is that it is not always a trivial matter to decide which of the meanings conveyed is explicit (grammatical) and which implicit (pragmatic). Pragmatics and Grammar lays out a methodology for students and scholars to distinguish between the two.

Pragmatics is sometimes characterized as dealing with the effects of context. This is equivalent to saying it deals with utterances, if one collectively refers to all the facts that can vary from utterance to utterance as 'context.'. One must be careful, however, for the term is often used with more limited meanings.

Pragmatics (Stanford Encyclopedia of Philosophy)

Pragmatics is a branch of linguistics concerned with the use of language in social contexts and the ways people produce and comprehend meanings through language. The term pragmatics was coined in the 1930s by psychologist and philosopher Charles Morris. Pragmatics was developed as a subfield of linguistics in the 1970s.

Speech Acts. One important area of pragmatics is that of speech acts, which are communicative acts that convey an intended language function. Speech acts include functions such as requests, apologies, suggestions, commands, offers, and appropriate responses to those acts. Of course, speakers of these acts are not truly successful until the intended meaning they convey are understood by listeners.
