A Users Guide To Braille

This guide is full of 40 individual resources for users of Braille, including parents, teachers, and anyone else interested in this tactile reading system developed in the 19th century. Sections include Braille teaching resources, technology resources for people with visual impairments, Braille resources for kids, and more.

Guide to Braille Resources | SuperSummary

Braille is a tactile system of raised dots used by people who are blind or have low vision to read with their fingers. Braille is not a different language. It is a code like the Secret Code or Crack the Code worksheets we have all played as kids where a picture, or in this case braille cell, represents a letter or number.

Beginner's Guide to Braille - Everyday Sight

Kester Braille provides a user-friendly script of the way she taught braille. Level 1 consists of teaching alphabet and beginning sounds in Braille, and Level 2 teaches three-letter words with short vowel sounds, writing sentences, and numbers 0 to 20.

Braille Instructional Resources

To use the braille keyboard, you must be on the home screen, on some HTML content (such as a webpage), or editing a text field. If any of these is true, turn your rotor to "braille screen input". Your device will switch to landscape mode if it is in portrait, and you can begin.

Instruction Manual for Braille Transcribing

A common question I receive as a power user of Braille devices on iOS who works with the deaf-blind population is what apps do I find most helpful, and which are most accessible to Braille only users? With over 150 apps on my iDevices, I certainly can't or won't try to list them all.

Top four picks for Braille users of iDevices | National ...

Additionally, just as the wrong wrench can ruin a nut, using poor quality Braille paper can ruin the printer's pins, print shoes and moveable parts by causing them to wear out prematurely. Failures due to user negligence of this nature, just as repairs carried out by untrained personnel, may compromise your warranty rights.

User's Guide

If your braille display has a braille keyboard, you can use it to enter text or do the following commands. The command to toggle the keyboard is Space + Dots 1-3. Use the following commands for keyboard input. Braille dots Narrator command; 1-2-3-4 or 1-2-3-4-7:

Chapter 8: Using Narrator with braille - Windows Help

First the inserting rules are applied between the beginning and the first figure "3". Here we will have a match with the last number prefix rule, i.e. the rule that inserts a number prefix (Braille symbol p3456, i.e. dots 3, 4, 5 and 6). The number prefix symbol will therefore be inserted into the translated text.
