Advanced Fluid Mechanics. This photo sequence shows the " gobbling droplets " phenomenon. A jet of liquid is unstable because of surface tension and usually breaks into small droplets. The addition of minute quantities of polymeric molecules provides an additive elastic stress which stabilizes the liquid column.

The computational fluid mechanics (CFM) database is a collection of three-dimensional data (e.g. velocity field) for complex turbulent flows. The CFM research group has generated these data by performing DNS and LES using high-performance supercomputers. The database provides references, instructions and post-processor to read and plot the data.
