PPAP is a series of documents gathered in one specific location (a binder or electronically) called the "PPAP Package". The PPAP package is a series of documents which need a formal certification / sign-off by the supplier and approval / sign-off by the customer. The form that summarizes this package is called PSW (Part Submission Warrant).

Production part approval process - Wikipedia

The purpose of the Production Part Approval Process (PPAP) is: □ To provide the evidence that all SLTN engineering design and specification requirements are properly understood and fulfilled by the Supplier. □ To demonstrate that the Suppliers manufacturing process has the potential to

produce product that consistently meets all requirements during an actual production run at the quoted production rate.

Supplier Production Part Approval Process (PPAP) Manual

PPAP defines the approval process for new or revised parts, or parts produced from new or significantly revised production methods. The PPAP process consists of 18 elements that may be required for approval of production level parts. Not all of the elements are required for every submission.

PPAP | Production Part Approval Process | Quality-One

The purpose of PPAP is to determine if all customer engineering design record and specification requirements are properly understood by the supplier and that the process has the potential to produce product consistently meeting these requirements during an actual production run at the quoted production rate.
