Practice for Design and ...

The API RP 14E provides minimum requirements and guidelines for design and installation of new piping systems on production platforms located offshore. The API RP 14E offers sizing criteria for platform piping lines across three categories based on flow regime: single-phase liquid, single-phase gas and two-

phase gas/liquid.

Review of the API RP 14E erosional velocity equation ...

Over the last 40 years, the American Petroleum Institute recommended practice 14E (API RP 14E) equation has been used by many operators to estimate the erosional velocity. The API RP 14E equation has become popular because it is

Calculate API RP 14E maximum allowable erosional velocity for platform piping systems. The fluid density can be calculated for single phase, two phase, or three phase fluids. The erosional velocity is calculated from the fluid density and the C Factor.
