Not to be eclipsed by its new sibling, Beo4 is capable of controlling every single product in the range. Such is its power and simplicity that you can operate it confidently in the dark, without even having to point it at the source. What's more, after all these years it can still 'speak' to items dating back to the 1980s.

The introduction of the Beolink 1000 marked the start of a period of integration in the B&O range. Although it was not the first remote control which B&O offered that could operate both audio and video sources, it brought to an end a period where there had been a large number of confusing and incompatible remote control standards in the audio and video ranges.
