Candlestick Analysis

Candlestick analysis focuses on individual candles, pairs or at most triplets, to read signs on where the market is going. The underlying assumption is that all known information is already reflected in the price. The technique is usually combined with support & resistance. Each candle contains information about 4 prices: the high, the low, the open and the close.

Candlestick Analysis — Trend Analysis — Indicators and ...

Long white candlesticks show strong buying pressure. The longer the white candlestick is, the further the close is above the open. This indicates that prices advanced significantly from open to close and buyers were aggressive. While long white candlesticks are generally bullish, much depends on their position within the broader technical picture.
