Customary and Metric versions with Canadian spellingKids love this project!In this integrated math and reading project, students are assigned an area of the zoo to design. There are 8 areas of the zoo from which to choose. Each area has 4 animals. They must read about their four animals and creat

### Area And Perimeter Zoo Worksheets & Teaching Resources | TpT

Each hippo requires 75% of it pen be a pool (250 sq ft), and there are 2 of them. The exhibit is in the shape of a circle. To find Area.  $250 \times 2 = 500$  sq ft of pool are needed, but to find the area of land needed  $500 \times .75 = 375$ . Then the total area  $500 + 375 = 875$ . The exhibit needs to be a circle with an area of 875 square feet.

### Geometry Zoo Project by Erin Andre - Prezi

Each Elephant requires at least 300 sq ft and there are 3 of them at the Geometry zoo.  $300 \times 3 = 900$ . The key is 10 sq ft = 1 square so...  $900/9 = 90$ . So this pen must equal 90 squares. This moat is 10 ft wide, and 10, 18, and 20.6 squares long on various sides, sooo...  $1 \times 18 = 18$ ,  $1 \times 10 = 10$ ,  $1 \times 20.6 = 20.6$ .  $18 + 10 + 20.6 = 48.6$  squares.

### Geometry Zoo Project by Elizabeth Harp on Prezi Next

This is a math project designed for students to complete independently or with a group. Students will use area and perimeter to design a blueprint for a zoo. Students will choose at least 10 animals for their zoo and use the area requirements to design exhibits large enough to house each animal.

### Design a Zoo -- Area & Perimeter - 21st Century Math Project

If your geometry class feels like a zoo, then maybe you ought to join them! In this integrated 21st Century Math Project, students will put their area and perimeter skills to the test! Focusing on unique shapes, regular polygons & apothems and irregular figures, students determine which exhibits fit which animals needs.
