When Steve Jobs unveiled the Macintosh in 1984, it said "Hello" to us from the stage. Even at that point, speech synthesis wasn't really a new technology: Bell Labs developed the vocoder as early as in the late 30s, and the concept of a voice assistant computer made it into people's awareness when Stanley Kubrick made the vocoder the voice of HAL9000 in 2001: A Space Odyssey (1968).
