Contact the gas company to have gas valve turned on or contact your local Trane Comfort Specialist. Your system could be turned off or your unit unplugged. Recommended Action: Check your thermostat and heating unit to assure that they are both plugged in. Refer to your use and care guide or contact your local Trane Comfort Specialist.

HVAC Troubleshooting Guide | Trane

The contactor should be energized or "closed" on a call for cooling. If the contactors contacts do not pull in or close (completing the high voltage circuit) voltage will not pass thru to the compressor. If the contactor has proper low voltage applied to the coil and it does not pull in, it is a bad contactor.
