Agricultural and Food Science(AFSci) publishes original research reports on agriculture and food research in relation to primary production in boreal agriculture. Acceptable papers must be of international interest and have a northern dimension. The fields within the scope of the AFSci include

agricultural economics, agricultural engineering, animal science, environmental science, horticulture, plant and soil science and primary production-related food science.

Agricultural and Food Science - Journal.fi

In the long term, food systems must heed natural resource limits. Localized production and dietary changes are often suggested as potential solutions. However, no U.S. analyses fully evaluate the feasibility to scale localization across a range of diets. We therefore modeled the biophysical capacity for regional food systems based on agricultural land area and productivity, population, and 7 ...
