2001 Ben By Akemi Shimoda

The 520 (all 00 to 02 400 & 520) had a 39mm inlet on the head and better porting than the 525 (03 onwards 400, 450 & 525) which came with a 41mm inlet and requires building up with epoxy and grinding back to a better shape. Tuners used to look out for early heads as they were a much better design to work on. hrc630 Posted March 27, 2008
