Lido Route Manual

The Lido eRoute Manual is an electronic version of our navigation charts, using the superior Lido Route Manual standard to visualize data. Lido eRoute Manual is compatible with standard Windows environments. All of our charts show true-to-scale topographical information such as mountain heights and river courses and are oriented magnetic north up. Lido AMM (Airport Moving Map) is seamlessly integrated into Lido eRoute Manual, enhancing situational awareness during ground operations and ...

Lido eRoute Manual - Solutions, Flight Operations ...

Lido Route Manual represents innovative and state-of-art procedure charts displaying only relevant flight information that supports flight operation efficiency while reducing the pilot's workload. Navigation chart content focuses on Airline Operations and meets the highest standards in terms of precision and quality. All charts are to scale and standardized with color coding for terrain depiction.

Your LIDO 3 Manual Coffee Grinder uses a specially engineered Static dissipative grinds jar, but depending on your beans and environment, you may still encounter a small amount of static which causes the lightest grinds and chaff to stick to the lower burr area. This is normal, and unavoidable. To alleviate this, grind your coffee a few minutes

The LIDO flight planning function is fairly good. A few minor hiccups every now and then. Things such as missing waypoints on the flight plan or waypoints that aren't on the route, but the lat/long is on the route. Winds are fairly good and a/c specific fuel burn tends to be very accurate.

LIDO charts and manuals - PPRuNe Forums

Lido eRoute Manual - what is your take? Been using Lido charts on EFB/iPads now for a few years and a new version (5) came out recently. As a lifelong Jepp user previously, I really can't get to grips with this non-intuitive layout and workings.

Lido eRoute Manual - what is your take? - PPRuNe Forums

Now on to what the Lido charts call an Airport Facility Chart (AFC), a chart that is completely missing from the old chartset. It provides an overview of the whole terminal control area of the airport including topographic information, Nav aids and holding points. Quite the useful charts for general situational awareness, I think.

In practice, this means that pilots use the terminal charts during takeoff and landing and then have to manually switch to the enroute module for the flight. The Lido/AMM Airport Moving Map, which is used to navigate between the runway and the gate, is already fully dynamic in itself, but it is still separate from the other charts.
