Manual and automatic air conditioners are used to cool homes, businesses and vehicles. Manual and automatic systems primarily cool one room or zone in a home or building, or for a small space, such as a vehicle. These units do not require a "whole home" HVAC duct work system to operate. Only central air conditioning systems require duct work.

Difference Between Automatic Air Conditioning Vs. Manual ...

An automotive air conditioning system works a lot like the AC system that you have at home or the office. It serves one very fundamental purpose, as well, and that is to cool you down. As a matter of fact, it would be quite difficult to imagine a modern vehicle without some means of providing a cooler and more comfortable ride especially when the scorching sun of summer unleashes its wrath.
