Tutorial start here. Library Reference keep this under your pillow. Language Reference describes syntax and language elements.

3.8.6rc1 Documentation
Julia enables package developers and users to document functions, types and other objects easily via a built-in documentation system since Julia 0.4. The basic syntax is simple: any string appearing at the toplevel right before an object (function, macro, type or instance) will be interpreted as documenting it (these are called docstrings).
