Oregon Scientific Weather Station Model

Fires of this size usually don't spread in the West until August or September. But this year, following a remarkably dry winter in much of the West, the season began as early as April, when fires in ...

Extreme Weather and Climate Updates

The record-smashing Pacific Northwest heat wave suggests that climate change has forced us past a tipping point for temperatures.

This summer could change our understanding of extreme heat

Heat waves that buckle streets. Flash floods that wipe out entire towns. Wildfires that create their own weather. Even for the most plugged-in scientists, this summer's climate disasters have come as ...

Our infrastructure can't handle climate disasters. We need to build differently.

The extremity of the heat wasn't just unusual — it would have been “virtually impossible without human-caused climate change,” according to a new analysis by 27 climate scientists from the World ...

Pacific Northwest heatwave would have been “virtually impossible” without climate change, experts say

Experts fear Jacobabad's extreme heat and humidity may worsen with climate change – and that other cities may join the club ...

Hotter than the human body can handle: Pakistan city broils in world's highest temperatures

If verified, the 130 degrees Fahrenheit (54.4°C) reading at the Furnace Creek Visitor's Center on Friday, July 9, 2021, would be Earth's highest reliably measured temperature.

Death Valley, California, breaks the all-time world heat record for the second year in a row

When Amazon founder Jeff Bezos took what some viewed as a joyride to the edge of space earlier this week and then thanked the employees of his e-commerce empire for pa ...
