Label the unit circle axis (-1 and 1's) and the trig graph x-axis (0degs to 360degs). Do not yet label the y-axis. Use a piece of spaghetti to mark a the unit distance from the origin at 15degs to the x-axis. Stick it down and label the angle. Take another piece of spaghetti and measure the y-coordinate ($\sin(x)$) of the point on the circle.
