Mudpuppy Salamander Dissection KSU CVA Part 1

You will dissect the salamander and frog to learn the digestive and urogenital systems. For these systems, most vertebrates are dissected in a similar way, just the layout of the body differs and organs will be different in shape and in somewhat different places. You can follow the same set of instructions for a salamander or a frog.

salamander anatomy

In addition to frogs and toads, amphibians include salamanders (newts are in that group) and caecilians, burrowing worm-like animals that have jaws and teeth. Metamorphosis is the scientific term for a life cycle which includes a larval stage that looks very different from the adult stage; the word means ‘change form.’ (You can watch metamorphosis firsthand with an inexpensive Frog Hatchery Kit !)
