The Coral Reef White Star

This is another book from White Star Publishing of Italy. It is not, however, another diving guide. A quick glance at the contents reveals how this book seeks to explain the Coral Reef - from 500 million years ago to the present day, its geography, biology and, of course, those all-important living creatures. That is a pretty tall order.

Read Free PDF

The largest coral reef in the world, the Great Barrier Reef, has about 500 species of algae, as well as blue-green algae (cyanobacteria) that is responsible for the formation of red, purple, green or brown tufts on the coral reef. Red algae contribute to the formation of hard crusts that help expand the size of the coral reef.
