attachment and cutting tip series to meet your needs.

Victor Professional - Chudov

Welding and/or cutting can cause fire and explosion if it is not done properly. The electric arc and gas flame produces tremendous heat; compressed gas tanks can explode if not handled properly and employees can suffer severe burns or other injuries from these processes. Welding and cutting can only be done in fire safe areas.

Acetylene Welding Torches + Tips | Northern Tool

When starting a cut in steel away from the edge, pierce a hole through the metal to start the cut (Figure 7.3). To do this, heat a spot to cherry red, raise the torch ½-inch or more above the normal position for cutting to prevent slag from being blown against and fouling the tip, and slowly press the cutting-oxygen lever. CAUTION

OXY-FUEL WELDING, HEATING AND CUTTING

Welding, Cutting or Heating of Metals Coated with Lead-Bearing Paint. STD 03-08-001 [STD 3-8.1], (October 30, 1978). Explains the requirements imposed by 29 CFR 1926.353 (c) (2) (i) and 29 CFR 1926.354 (c) (1) when welding, cutting or heating is performed in an enclosed space on metals coated with lead-bearing paint.

Safety and Health Topics | Welding, Cutting, and Brazing

...

When cutting, the metal is first heated by the flame until it is cherry red. Once this temperature is attained, oxygen is supplied to the heated parts by pressing the oxygen-blast trigger. This oxygen reacts with the metal, producing more heat and forming an oxide which is then blasted out of the cut. It is the heat that
